DETAILED ACTION

Response to Amendment

1. The amendment filed March 24, 2008 has been entered and claims 9 and 27-29 have been cancelled.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 26 is rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. ("Chen")
US PG-Pub 2005/0082575.

Chen discloses a nitride-based semiconductor light-emitting device comprising: a first conductivity type first nitride-based semiconductor layer 30 formed on a substrate 10; an active layer 40 formed on said first conductivity type first nitride-based semiconductor layer; a second conductivity type second nitride-based semiconductor layer 50, having a single layer structure; an undoped contact layer 100 (page 3, 2nd column, last line) formed directly on said second nitride-based semiconductor layer; and an electrode 110 (fig. 5D) formed directly on said undoped contact layer, wherein said undoped contact layer has a thickness within the recited range (par. 21).

Note that the thickness of the second conductivity layer 50 is not described. However, it should be noted that layer 90 is between 1000 and 4000 angstroms (par. 23) and it is clear (as

shown in fig. 5) that layer 50 if not thicker than is at least as thick as layer 90; thus, the limitation “a second conductivity type ... having a thickness of at least 0.1 μm ” is met.

Allowable Subject Matter

4. Claims 1-4, 6, 7, 12, 14-16 and 23 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
